| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                                         |
| Applikation              | ELISA                                                                                                                                                                                                                                                                     |
| Produktbeschreibung      | The human B cell activating factor (BAFF) and APRIL(a proliferation inducing ligand) are both type II molecules belonging to the TNF superfamily. They are expressed by non-B cells, and are down-regulated by mitogenic stimulation. <sup>2</sup> BAFF and APRIL bind... |
