## Product Datasheet

### **CD51 (CD51 Antigen, Integrin alpha V, ITGAV, Msk8, Vitronectin Receptor alpha Polypeptide, Vitronectin Receptor Subunit alpha, VNRA) (MaxLight 650), IgG1, Clone: [RMV-7], Rat, Monoclonal USB-C2405-11P-ML650**

|                          |                                                                                                                                                                                                                                                               |

| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FC, IHC, IP                                                                                                                                                                                                                                                   |
| Immunogen                | Cultured LAK cells from Balb/c mice.                                                                                                                                                                                                                          |
| Produktbeschreibung      | MaxLight(TM)650 is a new Far-IR stable dye conjugate comparable to Alexa Fluor(TM)647, DyLight(TM)649, Cy5(TM) and offers better labeling efficiency, brighter imaging and increased immunodetection. Absorbance (655nm), Emission (676nm), Extinction Coe... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [RMV-7]                                                                                                                                                                                                                                                       |
| Isotyp                   | IgG1                                                                                                                                                                                                                                                          |

|              |                                                                                |
|--------------|--------------------------------------------------------------------------------|
| UniProt      | <a href="#">P43406</a>                                                         |
| Reinheit     | Purified by Protein G affinity chromatography from tissue culture supernatant. |
| Formulierung | Supplied as a liquid in PBS, pH 7.2. Labeled with MaxLight(TM)650.             |
