| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | Stem Cell Factor (SCF) is a glycoprotein that plays a key role in hematopoiesis acting both as a positive and negative regulator, often in synergy with other cytokines. SCF binds to and activates the SCF receptor (SCFR), a receptor tyrosine kinase. S... |
| Molekulargewicht         | 18.5                                                                                                                                                                                                                                                          |
| Reinheit                 | 95% by SDS-PAGE. Purified by using conventional chromatography techniques.                                                                                                                                                                                    |
| Formulierung             | Supplied as a liquid in PBS, pH 7.4.                                                                                                                                                                                                                          |
