| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | HTATIP2, also known as TIP30, is a member of the short-chain dehydrogenases/reductases (SDR) family. It acts as a tumor suppressor participating in metabolic suppression, inhibition of angiogenesis and induces the expression of apoptosis related gene... |
| Molekulargewicht         | 29.3                                                                                                                                                                                                                                                          |
| NCBI                     | <a href="#">15358</a>                                                                                                                                                                                                                                         |
| Reinheit                 | 95% (SDS-PAGE).                                                                                                                                                                                                                                               |
| Formulierung             | Supplied as a liquid in 20mM Tris-HCl, pH 8.0, 10% glycerol, 1mM DTT.                                                                                                                                                                                         |
