| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                        |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, IHC, WB                                                                                                                                                                                                                                                |
| Immunogen                | Synthetic peptide selected from the N-terminal region of human URKL1 (KLH).                                                                                                                                                                                   |
| Produktbeschreibung      | Uridine kinase is a key enzyme in the pyrimidine salvage pathway of all mammalian cells. URKL1 (uridine kinase-like 1) is highly similar in structure and sequence to uridine kinase. Applications: Suitable for use in ELISA, Western Blot, and Immunohis... |
