| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Wirt                     | Sheep                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, FC, IF, IHC                                                                                                                                                                                                                                            |
| Immunogen                | Purified human von Willebrand factor prepared from citrated human plasma                                                                                                                                                                                      |
| Produktbeschreibung      | Applications: Suitable for use in Flow Cytometry, ELISA, Immunofluorescence, Immunodiffusion and Immunohistochemistry. Other applications not tested. Recommended Dilutions: Immunodiffusion: Neat Immunohistochemistry: frozen Optimal dilutions to be de... |
| UniProt                  | <a href="#">P04275</a>                                                                                                                                                                                                                                        |
| Reinheit                 | Purified by Ion Exchange chromatography.                                                                                                                                                                                                                      |

|              |                                                                                                                      |
|--------------|----------------------------------------------------------------------------------------------------------------------|
| Formulierung | Supplied as a liquid in glycine buffered saline, pH 7.4, 0.01% benzamidine, 0.1% EACA, 1mM EDTA, 0.09% sodium azide. |
