| Alternativnummer         | CSB-EP008605HU1-1, CSB-EP008605HU1-100, CSB-EP008605HU1-20                                                                                                                                                                          |
| Hersteller               | Cusabio                                                                                                                                                                                                                             |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                    |
| Molekulargewicht         | 38.1 kDa                                                                                                                                                                                                                            |
| Tag                      | N-terminal 6xHis-GST-tagged                                                                                                                                                                                                         |
| UniProt                  | <a href="#">O15552</a>                                                                                                                                                                                                              |
| Puffer                   | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.89. |
| Quelle                   | E.coli                                                                                                                                                                                                                              |
| Expression System        | 277-330aa                                                                                                                                                                                                                           |
| Reinheit                 | Greater than 85% as determined by SDS-PAGE.                                                                                                                                                                                         |
| Formulierung             | Liquid or Lyophilized powder                                                                                                                                                                                                        |
| Sequenz                  | SSVVRRAFGRGLQVLRNQGSLLGRRGKDTAEGTNEDRGVGQGEGMPSSD<br>FTTE                                                                                                                                                                           |

Anwendungsbeschreibung

Research Areas: Metabolism
