Reinheit	GFP control protein was synthesized with an amino terminal 6XHIS tag and was expressed in E. coli and purified by sequential hydrophobic interaction chromatography, DEAE chromatography and size-exclusion chromatography. Assay by immunoelectrophoresis resulted in a single precipitin arc against Anti-GFP. Analysis by SDS-PAGE resulted in a pattern consistent with purified GFP and was estimated to be greater than 90% pure.
Formulierung	Liquid (sterile filtered)

Application Verdünnung	ELISA: User Optimized, IP: User Optimized, WB: User Optimized
Anwendungsbeschreibung	Application Notes: GFP Control is suitable as a control for polyclonal or monoclonal Anti-GFP in immunological assays. Researchers should determine optimal titers for applications. The molecular weight of GFP is 28 kDa. Green Fluorescent Protein has been tested in SDS-page, western blot, and immunoprecipitation
