| Spezies Reaktivität      | Human, Mouse                                                                                                                                                                                                                                                  |
| Immunogen                | Peptide sequence around phosphorylation site of serine 22 (I-E-S(p)-L-R) derived from Mouse IκB-e.                                                                                                                                                            |
| Produktbeschreibung      | Inhibits NF-kappa-B by complexing with and trapping it in the cytoplasm. Inhibits DNA-binding of NF-kappa-B p50-p65 and p50-c-Rel complexes. Shirane M, et al. (1999) J Biol Chem, 274(40): 28169-74 Karin, M. and Ben-Neriah, Y. (2000) Annu. Rev. Immuno... |
