| Immunogen                | Peptide sequence around phosphorylation site of serine 849 (Q-Q-S(p)-I-N ) derived from Human GluR1.                                                                                                                                                          |
| Produktbeschreibung      | Glutamate receptors are the predominant excitatory neurotransmitter receptors in the mammalian brain and are activated in a variety of normal neurophysiologic processes. These receptors are heteromeric protein complexes with multiple subunits, each p... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
