| Spezies Reaktivität      | Human, Mouse, Rat                                                                                                                                                                                                                                             |
| Immunogen                | Peptide sequence around phosphorylation site of serine 62 (P-L-S(p)-P-S) derived from Human Myc.                                                                                                                                                              |
| Produktbeschreibung      | Participates in the regulation of gene transcription. Binds DNA in a non-specific manner, yet also specifically recognizes the core sequence 5-CAC[GA]TG-3. Seems to activate the transcription of growth-related genes. Baudino T A, et al. (2001) Mol Ce... |
