| Immunogen                | Recombinant human TYRP1 protein                                                                                                                                                                                                                               |
| Produktbeschreibung      | It reacts with a 75kDa melanocyte-specific gene product, identified as Tyrosinase-related protein-1 (TRP-1). It is involved in melanin synthesis. TRP1 is present on the melanosomal membranes of melanoma, normal melanocytes and nevi.Recent evidence sp... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
