| Produktbeschreibung      | Twenty human keratins are resolved with two-dimensional gel electrophoresis into acidic (pI 40kDa (CK19). Many studies have shown the usefulness of keratins as markers in cancer research and tumor diagnosis. AE-1/AE-3 is a broad spectrum anti pan-cyt... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [AE-1/AE-3]                                                                                                                                                                                                                                                   |
