### Human ALK-7/Activin RIC Protein, Ultra Low Endotoxin (ALK-HM107-UL) KAB-ALK-HM107-UL

|                          |                                                                                                                                                   |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Artikelname              | Human ALK-7/Activin RIC Protein, Ultra Low Endotoxin (ALK-HM107-UL)                                                                               |
| Artikelnummer            | KAB-ALK-HM107-UL                                                                                                                                  |
| Hersteller Artikelnummer | ALK-HM107-UL                                                                                                                                      |
| Alternativnummer         | KAB-ALK-HM107-UL-100UG, KAB-ALK-HM107-UL-500UG                                                                                                    |
| Hersteller               | KactusBio                                                                                                                                         |
| Kategorie                | Proteine/Peptide                                                                                                                                  |
| Spezies Reaktivität      | Human                                                                                                                                             |
| Produktbeschreibung      | Recombinant Human ALK-7/Activin RIC Protein is expressed from HEK293 with His tag at the C-terminus.It contains Glu21-Glu113....                  |
| Molekulargewicht         | The protein has a predicted MW of 11.11 kDa. Due to glycosylation, the protein migrates to 20-40 kDa based on Bis-Tris PAGE result.               |
| Tag                      | C-His                                                                                                                                             |
| UniProt                  | <a href="#">Q8NER5</a>                                                                                                                            |
| Puffer                   | Lyophilized from 0.22 µm filtered solution in 20mM Tris, 150mM NaCl (pH 7.5). Normally 8% trehalose is added as protectant before lyophilization. |
| Expression System        | HEK293                                                                                                                                            |
| Reinheit                 | > 95% as determined by Bis-Tris PAGE,> 95% as determined by HPLC                                                                                  |

|                  |                   |
|------------------|-------------------|
| Formulierung     | Lyophilized       |
| Sequenz          | Glu21-Glu113      |
| Target-Kategorie | ALK-7/Activin RIC |
