| Spezies Reaktivität      | Plant                                                                                                                                                                                                                                                         |
| Immunogen                | Fusion protein encoding region for the Chlamydomonas reinhardtii N-terminal part of CDJ1 Q66YD3, overexpressed in E.coli                                                                                                                                      |
| Produktbeschreibung      | CDJ1 is one of three zinc-finger containing J domain proteins of Chlamydomonas reinhardtii. This protein is found in chloroplast. In spite that CDJ1 gene is heat shock inducible it does not reflect in increased CDJ1 protein levels. CDJ1 forms complex... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Molekulargewicht         | 40   40 kDa                                                                                                                                                                                                                                                   |
| NCBI                     | <a href="#">5716506</a>                                                                                                                                                                                                                                       |
| UniProt                  | <a href="#">Q66YD3</a>                                                                                                                                                                                                                                        |

|                        |                                                                                                       |
|------------------------|-------------------------------------------------------------------------------------------------------|
| Reinheit               | Serum                                                                                                 |
| Formulierung           | Lyophilized                                                                                           |
| Antibody Type          | Polyclonal Antibody                                                                                   |
| Application Verdünnung | 1: 3000 (WB)                                                                                          |
| Anwendungsbeschreibung | Western blot has been done on 10-50 µg load per well,<br>immunoprecipitation has been done on 5-50 µl |
