Anti-V-ATPase | Epsilon subunit of tonoplast H⁺ATPase (affinty purified, goat antibody), Goat, Polyclonal AGR-AS09-577A

Artikelname	Anti-V-ATPase Epsilon subunit of tonoplast H ⁺ ATPase (affinty purified, goat antibody), Goat, Polyclonal
Artikelnummer	AGR-AS09-577A
Hersteller Artikelnummer	AS09-577A
Alternativnummer	AGR-AS09-577A
Hersteller	Agrisera
Wirt	Goat
Kategorie	Antikörper
Applikation	IF, WB
Spezies Reaktivität	A. thaliana, Plant
Immunogen	KLH-conjugated synthetic peptide chosen from subunit E of plant V-ATPase including Arabidopsis thaliana At4g11150. Peptide is conserved in vacuolar H ⁺ -ATPase subunit E, isoform 1 to 3 (VHA-E1).
Produktbeschreibung	Plant vacuole V-ATPase is responsible for energization of transport of ions and metabolites, and acts as well house-keeping and as a stress response enzyme. V-ATPase is a multi-subunit enzyme composed of a membrane sector and a cytosolic catalytic se...
Klonalität	Polyclonal
Molekulargewicht	26 31 kDa (Arabidopsis thaliana)
NCBI	826716

UniProt	Q39258
Reinheit	Immunogen affinity purified serum in PBS pH 7.4.
Formulierung	Lyophilized
Antibody Type	Polyclonal Antibody
Application Verdünnung	1: 600 (IF), 1 : 1000-1 : 3000 (WB)
Anwendungsbeschreibung	V-ATPase is very sensitive for the redox of the SDS buffer. We recommend using at least 50-100 mM DTT freshly prepared before handling the sample. 2 hours incubation with primary antibody is recommended over over night incubation which can contribute to increased background.
