| Kategorie                | Antikörper                                                                                                                                                                                                 |
| Applikation              | ELISA, IHC, WB                                                                                                                                                                                             |
| Immunogen                | Purified human Kappa (k) Light Chain BAA37169.1                                                                                                                                                            |
| Konjugation              | hrp                                                                                                                                                                                                        |
| Produktbeschreibung      | Goat anti-human kappa (k) chain is a secondary antibody conjugated to HRP, which binds to human kappa chain in immunological assays. Antibody is affinity purified using solid phase human kappa chain.... |
| Klonalität               | Polyclonal                                                                                                                                                                                                 |
| Reinheit                 | Immunogen affinity purified goat IgG using solid phase Human Kappa (kappa) Light Chain                                                                                                                     |
| Formulierung             | Lyophilized                                                                                                                                                                                                |
| Antibody Type            | Polyclonal Antibody                                                                                                                                                                                        |

|                        |                                                                                                                                                                                                                                             |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | 1: 200 - 1: 5000 (ELISA), 1 : 500-1 : 5 000 (IHC), 1 : 200-1 : 5000 (WB)                                                                                                                                                                    |
| Anwendungsbeschreibung | Rehydrate with 0.55 ml of deionized water and let stand 30 minutes at room temperature to dissolve. (Product has been overfilled to ensure complete recovery.) Centrifuge to remove any particulates. Prepare fresh working dilution daily. |
