| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | Phosphatidic acid phosphatase type 2 (PAP2) was originally identified as a plasma membrane enzyme that catalyses the dephosphorylation of the putative second messenger, phosphatidic acid (PA) to diacylglycerol (DG) [1]. Subsequently, multiple isoform... |
| Concentration              | See vial for concentration                                                                                                                                                                                                                                    |
| Isotype                    | IgG                                                                                                                                                                                                                                                           |
| UniProt                    | <a href="#">O14495</a>                                                                                                                                                                                                                                        |
| Buffer                     | Provided as solution in phosphate buffered saline with 0.08% sodium azide                                                                                                                                                                                     |

|                   |                                                                                                                              |
|-------------------|------------------------------------------------------------------------------------------------------------------------------|
| Source            | Rabbits were immunized with a unique peptide derived from the human lysophospholipid phosphatase 3 protein.                  |
| Purity            | Ammonium Sulfate Precipitation                                                                                               |
| Form              | Unconjugated                                                                                                                 |
| Application Notes | This antibody can be used for Western blotting (10-15 µg/ml). Optimal concentration should be evaluated by serial dilutions. |
