Application Notes

WesternBlot: To detect hEotaxin by Western Blot analysis this antibody can be used at a concentration of 0.25-0.50 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hEotaxin is 0.5-1.0 ng/lane, under reducing or non-reducing conditions.. Sandwich: In a sandwich ELISA (assuming 100µl/well), a concentration of 1.0-2.0 µg/ml of this antibody will detect at least 800 pg/ml of recombinant human Eotaxin when used with BioGems biotinylated antigen affinity purified anti-human Eotaxin (60-122GBT) as the detection antibody at a concentration of approximately 0.5-1.0 µg/ml.. Reconstitution: Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.
