| Alternative Catalog Number | ICT-MITCAP200-1                                                                                                                                                                                                                                            |
| Manufacturer               | ImmunoChemistry Technologies                                                                                                                                                                                                                               |
| Category                   | Kits/Assays                                                                                                                                                                                                                                                |
| Product Description        | This kit utilizes a cell permeable two-color stain to simultaneously detect caspase activity and mitochondrial membrane potential (MMP) in cells. Active caspase-3 and -7 are detected with the caspase probe FAM-DEVD-FMK and MMP with a cationic dye.... |
| Target                     | Caspase-3/7                                                                                                                                                                                                                                                |
