| Immunogen                  | Affinity Purified early antigen polypeptides from induced Raji cells precipitated with African Burkitts lymphoma sera                                                                                                                                         |
| Product Description        | Epstein-Barr virus (EBV), also designated human herpesvirus 4 (HHV-4), is a member of the herpesvirus family and is one of the most common human viruses. EBV infects B cells and, though often asymptomatic, it can cause infectious mononucleosis, a dis... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [1108-1]                                                                                                                                                                                                                                                      |
| Molecular Weight           | 50/55kDa doublet                                                                                                                                                                                                                                              |
| Isotype                    | IgG1                                                                                                                                                                                                                                                          |

|                   |                                                                                                                                                                        |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCBI              | Not Applicable                                                                                                                                                         |
| Form              | 200ug/ml of Ab Purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml. |
| Antibody Type     | Monoclonal Antibody                                                                                                                                                    |
| Application Notes | Immunofluorescence (1-2ug/ml), Optimal dilution for a specific application should be determined.                                                                       |
