| Manufacturer               | Astra Biotech GmbH                                                                                                                                                                                                                          |
| Category                   | Kits/Assays                                                                                                                                                                                                                                 |
| Species Reactivity         | Human                                                                                                                                                                                                                                       |
| Product Description        | Qualitative Real-Time PCR detection of Ureaplasma urealyticum and Ureaplasma parvum DNA (in tubes)...                                                                                                                                       |
| Sensitivity                | Analytical sensitivity: 1000 copies of U. urealyticum, U. parvum genomic DNA per 1 mL (i.e. 10 copies of genomic DNA per reaction)                                                                                                          |
| Samples                    | Urethral swabs, endocervical and vaginal swabs and urine samples                                                                                                                                                                            |
| Target                     | Ureaplasma urealyticum and Ureaplasma parvum                                                                                                                                                                                                |
| Application Notes          | Format F: liquid reaction mix is in 1.5 mL tube. Validated with Qiagen Rotor-Gene Q, Corbett Research Rotor-Gene 3000/6000, Bio-Rad CFX96, CFX96 Touch, DNA-Technology DTprime (corresponds to DTLite, SaCycler) and Roche Light Cycler 96. |
