| Manufacturer               | Rockland Immunochemicals                                                                                                                                                                                                                                      |
| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | Total RNA was prepared from cell line WM3301. WM3301 is a human metastatic melanoma cell line that displays flat cell morphology and requires insulin and 10% culture medium for growth. This cell line features the specific V600E (Val600Glu) mutation a... |
| Concentration              | 200 ng / µl (by UV absorbance at 260 nm)                                                                                                                                                                                                                      |
| Buffer                     | RNase free water                                                                                                                                                                                                                                              |
| Source                     | Human                                                                                                                                                                                                                                                         |
| Form                       | Liquid                                                                                                                                                                                                                                                        |
| Application Notes          | Purified RNA is suitable for a number of molecular biology applications including but not limited to next generation sequencing and expression library construction, PCR, real-time PCR, microarray analysis, and transfection experiments.                   |
