| Species Reactivity         | Human                                                                                                                                                                                                                                                          |
| Product Description        | Human Arylalkylamine-N-Acetyltransferase (AANAT) ELISA Kit for detecting AANAT in tissue homogenates, cell lysates, other biological fluids. Species Reactivity: Human (Homo sapiens). Detection Range: 1.56-100u/ml. Sensitivity: 0.6u/ml. Format: 96-Well... |
| Range                      | 1.56-100u/ml                                                                                                                                                                                                                                                   |
| Sensitivity                | 0.6u/ml                                                                                                                                                                                                                                                        |
