| Immunogen                  | Recombinant protein (or fragment). This information is considered to be commercially sensitive.                                                                                                                                                         |
| Product Description        | This gene encodes a protein that contains the CHROMO (CHROMatin Organization MODifier) domain. The encoded protein is a component of the Polycomb repressive complex 1 (PRC1), and is thought to control the lifespan of several normal human cells.... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                              |
| Concentration              | WB                                                                                                                                                                                                                                                      |
