| Species Reactivity         | Human                                                                                                                                                                                                                                                          |
| Immunogen                  | Recombinant protein (or fragment). This information is considered to be commercially sensitive.                                                                                                                                                                |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                                   |
| Product Description        | This gene encodes an integral membrane protein that functions as a transporter of thyroid hormone. The encoded protein facilitates the cellular importation of thyroxine (T4), triiodothyronine (T3), reverse triiodothyronine (rT3) and diiodothyronine (T... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                     |
| Molecular Weight           | 60kDa                                                                                                                                                                                                                                                          |
| NCBI                       | <a href="#">6567</a>                                                                                                                                                                                                                                           |
