| Species Reactivity         | Human                                                                                                                                                                                                                                                  |
| Immunogen                  | Recombinant protein (or fragment). This information is considered to be commercially sensitive.                                                                                                                                                        |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                           |
| Product Description        | This gene encodes a member of the mitogen-activated protein kinase kinase kinase family. The encoded protein activates key effectors in cell signalling, among them c-Jun. Alternatively spliced transcripts encoding multiple isoforms have been o... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                             |
| Molecular Weight           | 101kDa                                                                                                                                                                                                                                                 |
| NCBI                       | <a href="#">8491</a>                                                                                                                                                                                                                                   |
