| Product Description        | GTP is Guanosine-5-triphosphate, which is an extremely stable nucleotide. This compound and its sodium salt are essential components of energy conversion in biological systems and can be used in various related applications in molecular biology, such ... |
| Concentration              | 100 mM                                                                                                                                                                                                                                                         |
| Form                       | Liquid                                                                                                                                                                                                                                                         |
| Application Dilute         | In Vitro Transcription The optimal working dilution should be determined by the end user.                                                                                                                                                                      |
