| Molecular Weight  | 60 kDa                                                                                                                                                                                                                                                                                                                    |
| UniProt           | Not Known                                                                                                                                                                                                                                                                                                                 |
| Buffer            | PBS, 0.1% BSA, 0.05% azide                                                                                                                                                                                                                                                                                                |
| Source            | Animal                                                                                                                                                                                                                                                                                                                    |
| Application Notes | Does not react with Mouse or Rat, ELISA: Use Ab at 2-4 ug/mL for coating, Order Ab without BSA, Optimal dilution for a specific application should be determined by user. Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody |
