| Species Reactivity         | Human, Mouse                                                                                                                                                                                                                                                  |
| Immunogen                  | Synthetic peptide (N- and C- terminal peptides were used for immunisation: 1. ASGLGSPSPCSAGSEEDM & 2. CSRLANRAPEPPPQQAQQQ) - which peptide the antibody recognises has not been tested.                                                                       |
| Conjugation                | CF405S                                                                                                                                                                                                                                                        |
| Product Description        | CHD4/Mi-2b is a component of the nucleosome remodeling and deacetylase (NuRD) complex which is a multi-subunit protein complex containing both histone deacetylase and nucleosome-dependent ATPase subunits. Current models predict that this complex func... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |

|                   |                            |
|-------------------|----------------------------|
| Concentration     | 0.1 mg/mL                  |
| Clone Designation | [3F2/4]                    |
| Molecular Weight  | 238 kDa                    |
| UniProt           | <a href="#">Q14839</a>     |
| Buffer            | PBS, 0.1% BSA, 0.05% azide |
