| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | Recombinant fragment (around aa 142-240) of human CR2 (CD21) protein (exact sequence is proprietary)                                                                                                                                                          |
| Conjugation                | Biotin                                                                                                                                                                                                                                                        |
| Product Description        | Recognizes a protein of 140 kDa, which is identified as the complement receptor 2 (CR2) or CD21. This protein is expressed strongly on mature B cells, follicular dendritic cells and weakly on immature thymocytes and T lymphocytes. In B-cell ontogeny,... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | 0.1 mg/mL                                                                                                                                                                                                                                                     |
| Clone Designation          | [CR2/3247]                                                                                                                                                                                                                                                    |
