| Immunogen                  | Nuclei of Burkitts cells                                                                                                                                                                                                                                      |
| Product Description        | This monoclonal antibody is part of a new panel of reagents, which recognizes subcellular organelles or compartments of human cells. These markers may be useful in identification of these organelles in cells, tissues, and biochemical preparations. Th... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | 0.2 mg/mL                                                                                                                                                                                                                                                     |
| Clone Designation          | [121-3]                                                                                                                                                                                                                                                       |
| Molecular Weight           | Not Known                                                                                                                                                                                                                                                     |

|                   |                                                                                                                                                                                                                            |
