| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | Recombinant fragment of human Ki67 protein (around aa 2293-2478) (exact sequence is proprietary)                                                                                                                                                              |
| Product Description        | Ki-67 antigen is a nuclear, non-histone protein that is present in all stages of the cell cycle except G0. This characteristic makes Ki-67 an excellent marker for proliferating cells and is commonly used as one of the prognostic factors in cancer stu... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | 1 mg/mL                                                                                                                                                                                                                                                       |
| Clone Designation          | [MKI67/2461]                                                                                                                                                                                                                                                  |
| Molecular Weight           | 345 kDa and 395 kDa                                                                                                                                                                                                                                           |
