| Species Reactivity         | Human, Mouse, Rat                                                                                                                                                                                                                                             |
| Immunogen                  | The antiserum was produced against synthesized peptide derived from human M-CSF Receptor around the phosphorylation site of Tyr723. AA range:691-740                                                                                                          |
| Product Description        | The protein encoded by this gene is the receptor for colony stimulating factor 1, a cytokine which controls the production, differentiation, and function of macrophages. This receptor mediates most if not all of the biological effects of this cytokin... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
