| Immunogen                  | Synthetic Peptide of Histone H3 (Di Methyl Lys18)                                                                                                                                                                                                             |
| Product Description        | Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. This structure consists of approximately 146 bp of DNA wrapped around a nucleosome, an octamer composed of pairs of each of ... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
