| Application                | ELISA                                                                                                                                                                                                                                           |
| Species Reactivity         | Human                                                                                                                                                                                                                                           |
| Product Description        | Human Proenkephalin B ELISA Kit is a competitive Enzyme-Linked Immunosorbent Assay (cELISA) designed for the in vitro quantitative determination of human Proenkephalin B in serum, plasma, tissue homogenates, and other biological fluids.... |
| Range                      | 78.125-5000 pg/ml                                                                                                                                                                                                                               |
| Sensitivity                | 46.875 pg/ml                                                                                                                                                                                                                                    |
| Samples                    | Serum, plasma, tissue homogenates, and other biological fluids.                                                                                                                                                                                 |
| Target                     | Proenkephalin B                                                                                                                                                                                                                                 |
