| Application                | ELISA                                                                                                                                                                                                                                              |
| Species Reactivity         | Human                                                                                                                                                                                                                                              |
| Product Description        | Human Ryanodine Receptor ELISA Kit is a sandwich Enzyme-Linked Immunosorbent Assay (sELISA) designed for the in vitro quantitative determination of human Ryanodine Receptor in serum, plasma, tissue homogenates, and other biological fluids.... |
| Range                      | 0.625-40 ng/ml                                                                                                                                                                                                                                     |
| Sensitivity                | 0.375 ng/ml                                                                                                                                                                                                                                        |
| Samples                    | Serum, plasma, tissue homogenates, and other biological fluids.                                                                                                                                                                                    |
| Target                     | Ryanodine Receptor                                                                                                                                                                                                                                 |
