| Application                | ELISA                                                                                                                                                                                                                                                         |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Product Description        | Human Estrogen Inducible Protein pS2 ELISA Kit is a sandwich Enzyme-Linked Immunosorbent Assay (sELISA) designed for the in vitro quantitative determination of human Estrogen Inducible Protein pS2 in serum, plasma, tissue homogenates, and other biolo... |
| Range                      | 15.625-1000 pg/ml                                                                                                                                                                                                                                             |
| Sensitivity                | 9.375 pg/ml                                                                                                                                                                                                                                                   |
| Samples                    | Serum, plasma, tissue homogenates, and other biological fluids.                                                                                                                                                                                               |
| Target                     | Estrogen Inducible Protein pS2                                                                                                                                                                                                                                |
