| Category                   | Kits/Assays                                                                                                                                                                                                                                                  |
| Species Reactivity         | Human                                                                                                                                                                                                                                                        |
| Product Description        | The GENLISA Human Guanine Nucleotide Dissociation Inhibitor (GDI) ELISA includes features like: - Ready to use protocol with break-apart wells for ease of use - Standardisation and High Reproducibility - Lot to Lot Consistency - Accuracy and Precisi... |
| Range                      | 0.312 - 20 ng/ml                                                                                                                                                                                                                                             |
| Sensitivity                | 0.124 ng/ml                                                                                                                                                                                                                                                  |
| Samples                    | Serum, Plasma, Cell Culture Supernatant and other biological samples. Validated for citrated/EDTA Plasma only.                                                                                                                                               |
| Application Notes          | Colorimetric, Absorbance measured at 450nm                                                                                                                                                                                                                   |
