| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Human SALa. During the reaction, Human SALa in the sample or standard competes with a fixed amount of Human SALa on the solid pha... |
| Range                      | 2.47-200pg/mL                                                                                                                                                                                                                                                 |
| Sensitivity                | 0.93pg/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | SALa                                                                                                                                                                                                                                                          |
