| Immunogen                  | hen egg-white lysozyme (HEL)                                                                                                                                                                                                                                            |
| Product Description        | The anti-HEL monoclonal antibody (hen egg-white lysozyme) in nature is suitable for use as an isotype-matched control antibody to estimate the degree of non-specific binding by an antigen-specific antibody. The HEL D1.3-based recombinant isotype cont...           |
| Purity                     | >95% Determined by SDS-PAGE                                                                                                                                                                                                                                             |
| Application Notes          | Applications: an isotype-matched negative control used in ELISA,Western Blot (WB),Flow Cytometry (Flow),Immunoprecipitation (IP),Immunohistochemistry (Paraffin) (IHC (P)),Immunohistochemistry (Frozen) (IHC (F)),and in vivo animal model research. Shipping: Ice Bag |
