| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Human PDGFC mRNA encodes the human platelet derived growth factor C (PDGFC) protein, a member of the platelet-derived growth factor family. PDGFC plays an essential role in the regulation of embryonic development, cell proliferation, cell migration, ... |
| Target                     | mRNA                                                                                                                                                                                                                                                          |
| Application Notes          | MCE Product type: Oligonucleotides                                                                                                                                                                                                                            |
