| Product Description        | Human Lin-28 homolog A (LIN28A) mRNA encodes a LIN-28 family RNA-binding protein that acts as a posttranscriptional regulator of genes involved in developmental timing and self-renewal in embryonic stem cells. LIN28A functions through direct interact... |
| Target                     | mRNA                                                                                                                                                                                                                                                          |
| Application Notes          | MCE Product type: Oligonucleotides                                                                                                                                                                                                                            |
