| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Human IL4R mRNA encodes the human interleukin 4 receptor (IL4R) protein, a type I transmembrane protein that can bind interleukin 4 and interleukin 13 to regulate IgE production. IL4R also can bind interleukin 4 to promote differentiation of Th2 cell... |
| Target                     | mRNA                                                                                                                                                                                                                                                          |
| Application Notes          | MCE Product type: Oligonucleotides                                                                                                                                                                                                                            |
