| Product Description        | T cell receptors recognize foreign antigens which have been processed as small peptides and bound to major histocompatibility complex (MHC) molecules at the surface of antigen presenting cells (APC). Each T cell receptor is a dimer consisting of one ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
