| Product Description        | This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human SMPDL3B. Standards or samples are added to the micro ELISA plate wells and combined with the specific ... |
| Range                      | 0.62-40ng/mL                                                                                                                                                                                                                                                  |
| Sensitivity                | 0.229ng/mL                                                                                                                                                                                                                                                    |
| Samples                    | Serum, plasma and other biological fluids                                                                                                                                                                                                                     |
| Target                     | SMPDL3B                                                                                                                                                                                                                                                       |
