| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Species Reactivity         | Rabbit                                                                                                                                                                                                                                                        |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Rabbit PINP. During the reaction, Rabbit PINP in the sample or standard competes with a fixed amount of Rabbit PINP on the solid ... |
| Range                      | 246.9-20000pg/mL                                                                                                                                                                                                                                              |
| Sensitivity                | 90.4pg/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | PINP                                                                                                                                                                                                                                                          |
