| Species Reactivity         | All                                                                                                                                                                                                                                                           |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with SA. During the reaction, SA in the sample or standard competes with a fixed amount of SA on the solid phase supporter for sites o... |
| Range                      | 61.7-5000µg/mL                                                                                                                                                                                                                                                |
| Sensitivity                | 24.4µg/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | SA                                                                                                                                                                                                                                                            |
