Application Notes	Interleukin-1 beta belongs to the interleukin 1 cytokine family, which plays a critical role in inflammation, immunity, antiviral responses, and a variety of diseases. It has been reported that IL-1beta-induced IL-6 production is mediated by both PI3K and IRAK4 in A549 cells. To test the bioactivity of IL-1beta, A549 cells were seeded into 24-well plate at a density of 1×10^5 cells/ml, and allowed to attach overnight before treated with or without certain concentrations (1 ng/ml, 10 ng/ml) of IL1-beta for 4h. IL-6 levels in the cell supernatant were determined by ELISA that IL-6 increased significantly after stimulated with IL1-beta.
