| Immunogen                  | Recombinant protein (or fragment). This information is considered to be commercially sensitive.                                                                                                                                                               |
| Conjugation                | PE                                                                                                                                                                                                                                                            |
| Product Description        | The protein encoded by this gene is a pleiotropic cytokine produced by activated T cells. This cytokine is a ligand for interleukin 4 receptor. The interleukin 4 receptor also binds to IL13, which may contribute to many overlapping functions of this ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | FC (intra)                                                                                                                                                                                                                                                    |
| Molecular Weight           | 17 kDa                                                                                                                                                                                                                                                        |
